# Leul Negesse

## Full-Stack, DevOps & Automation Engineer

=251941104349 @ leulng21@gmail.com

OFFICIALLY APPROVED - staff - 2026-04-04

## SUMMARY

Full-stack, DevOps, and automation engineer experienced in software architecture, deployment, and process optimization. Skilled in leveraging automation tools and agile practices to accelerate delivery and reduce costs while aligning technology with business goals.

Results-driven full-stack and DevOps engineer specializing in scalable system deployments and workflow automation with n8n, Make, and Zapier. Proven track record leading teams to deliver high-impact products that boost efficiency and business growth.

## PROFESSIONAL EXPERIENCE

### Lead Developer

Aclesia — 02/2023 - 09/2025 — Remote

- Accelerated outbound sales cycle by 330% by designing and implementing customer acquisition platform for training and managing technical and IT teams
- Led full-stack development with Django, Next.js, and React Native.
- Built scalable APIs, automated workflows, and deployed via Docker G GitHub Actions.
- Managed a small development team and coordinated cross-functional projects.
- Optimized performance, improved reliability, and ensured smooth system operations.

### Full-Stack & DevOps Engineer

Gana — 10/2024 - 06/2025 — Adama, Ethiopia

- Developed backend services with NestJS and integrated Flutter apps.
- Implemented Dockerized CI/CD pipelines and automated deployments.
- Enhanced API performance and scalability using Redis G PostgreSQL.
- Monitored systems, resolved bottlenecks, and improved operational efficiency.

### Full Stack Developer

Impact Makers Foundation — 07/2019 - 11/2022 — Remote

- Built web and mobile apps using NestJS, Next.js, and FastAPI.
- Automated analytics workflows and optimized cloud deployments.
- Collaborated with teams to deliver high-performance solutions.
- Ensured scalability, reliability, and maintainable code architecture.

### Automation & Full-Stack Engineer

Freelancer — 05/2023 - Present — Remote

- Crea
- Created automation systems using n8n, Make, Zapier, and custom scripts to integrate APIs and workflows.
- Built web and mobile applications with Django, NestJS, Next.js, FastAPI, React Native, and Flutter.
- Deployed scalable solutions using Docker, Redis, PostgreSQL, and cloud services (AWS, DigitalOcean).
- Implemented CI/CD pipelines, version control with Git, and automated testing for robust deployments.
- Streamlined workflows, optimized performance, enhanced system reliability, and reduced operational overhead.

## EDUCATION

### Bachelor of Science, Computer Science and Engineering

Adama Science and Technology University — 2016 - 2021 — Adama

## TECHNICAL SKILLS

JavaScript | Node.js | SQL | React | Flutter | Python | Docker | CI/CD | n8n | React Native | Make

## KEY ACHIEVEMENTS

### 26th Place – ETCPC

Secured 26th place in the Ethiopian Collegiate Programming Contest (ETCPC), competing against top university teams nationwide.

Demonstrated advanced problem-solving, algorithm design, and coding efficiency under time constraints.

Enhanced teamwork, logical reasoning, and debugging skills through multiple rounds of competitive programming.

Applied knowledge of **data structures, algorithms, and full-stacfi development concepts** in practical coding challenges.

### Delivered Scalable Full-Stack Solutions

Designed, developed, and deployed **high-performance web and mobile applications** using **Django, NestJS, Next.js, React Native, and Flutter**.

Implemented **RESTful APIs, authentication, and database management** with PostgreSQL, Redis, and SQLite to ensure data integrity and scalability.

Optimized application performance and responsiveness across devices and platforms, enhancing user experience.

Set up **Docfierized environments, CI/CD pipelines, and cloud deployments** for seamless, production-ready solutions.

Collaborated with cross-functional teams to define architecture, implement best practices, and deliver projects on time.

Ensured maintainable, modular, and testable code for long-term project sustainability and easy scaling.
